

TMG 256

TMG 256 is a solid catalyst, which is used in esterification, transesterification and polycondensation reactions.

TMG 256 gives good results in the production of polyesters and alkyds.

The catalyst is used in concentrations between 0.06-0.1%.

Chemical characteristics

Formula	C ₄ H ₉ SnOOH
CAS No.	2273-43-0
Molecular weight	208.8
Tin content	≥55.5%
Chloride content	≤1%

Physical characteristics

State of aggregation	Powder
Color	White
Content of volatiles	≤1%

Storage

TMG 256 can be stored at least one year if kept closed in the original packaging.

Packaging

25kg/drum

Special advice for security

Information concerning:

- classification and labelling according to the regulations governing transport and hazardous chemicals
 - protective measures for storage and handling
 - safety measures in case of accident and fire
 - toxicity and ecological effects
- are given in our material safety data sheets.
