

TMG 219

Description

TMG 219 is a non-butyln catalyst with high tin content and high catalytic activity. Compared with DBTDL, it does not contain butyln and can meet the increasingly stringent regulatory requirements. As a catalyst, its application development will replace dibutyln dilaurate.

Product specification

Content (%)	≥99.0
Tin content (%)	17-19
Volatile (%)	≤0.4
Water content (%)	≤0.1
Specific gravity	1.00-1.15

Application

- Silicone rubber catalyst
- Silicone sealant catalyst
- Catalysts for polyurethane systems
- Replace DBTDL

Storage

Store in sealed container in a cool and dry place.

Packaging

25kg drum

Information concerning

- classification and labelling according to the regulations governing transport and hazardous chemicals
 - protective measures for storage and handling
 - safety measures in case of accident and fire
 - toxicity and ecological effects
- is given in our material safety data sheets.
